

CDP, Compact Diagnostic Partner, is a userfriendly Bluetooth based tool for car-specific diagnostics.

Reference Application

Bluetooth® tools for car specific diagnostics

Autocom is a Swedish company and a leader in diagnose systems for car workshops on a global basis.

Autocom has developed a range of wireless multi-brand diagnostic tools to meet the increasing demands on higher flexibility from car workshops.

Autocom provides the independent car workshops with a range of tools for wireless car-specific diagnostics.

User friendly diagnostic tools

The CDP's, compact diagnostic partners, are the new user friendly Bluetooth based tools for car-specific diagnostics. They can perform serial diagnose, read and erase fault code, basic settings, programming and perform service reset. In addition, they reset service-lamps, and can read live data via eOBD (European On Board Diagnose). Together with a Pocket PC (handheld) or PC they make powerful professional tools for a car workshop.

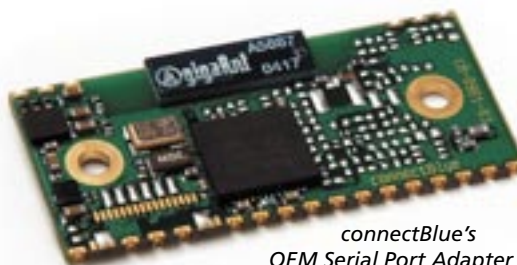

"Working in car workshops requires high flexibility and an ability to move around easily. Implementing Bluetooth wire-

less technology in our products have given our customers great ergonomic benefits," said Sam Berglund from Autocom."

Bluetooth requirements

For the Bluetooth connectivity connectBlue's OEM Serial Port Adapter was implemented, which gives the following features:

- Easy to integrate – no Qualification or Type Approval needed
- High performance - long range
- Future Proof – future generations of connectBlue's products will be compatible with current.

connectBlue's OEM Serial Port Adapter ready to implement for wireless connectivity.

About connectBlue

connectBlue is a leading provider of wireless solutions for demanding applications in segments like industrial automation, medical, instrumentation, diagnostics, logistics / transportation, vehicles and point of sales. Based on Bluetooth technology WLAN and ZigBee, connectBlue provides ready-to-use products and modules as well as custom design solutions in both hardware and software. www.connectblue.se
